

# Onlinemotor XL1200X Forty-Eight

Phat G:

This 2019 XL1200X Forty-Eight was built for the well-known motorcycle vlogger @Motonewbrider, a long-time friend of Sykes Harely-Davidson. The motorcycle features a Full Stage One tune, including a Two Brothers Racing 2-1 Exhaust, Two Brothers Racing Air filter, and a Vance and Hines FP3 Tuner.

The most striking feature of this motorcycle is the Ricks Motorcycles 240 rear tyre conversion. It comprises of a widened rear fender, a widened swingarm, a front pulley with increased offset, along with a 3-piece split rim to fit a 240-section rear tyre and a matching 3-piece split rim for the front wheel. The tank has been replaced with a larger aftermarket tank which provides aesthetic balance for the larger rear wheel, and of course added range.

The custom made "Fat Ape" Ape hanger Handlebars give this bike an eye-catching custom touch, along with the incredibly detailed paint job on the tank crafted by Image Design Custom.

This motorcycle also features Defiance Chrome grips and contrast cut rider foot pegs, a Custom CNC machined Derby cover, and a sidemount number plate. In the Rear Rizoma indicators have been used to create minimalist lines on the rear fender and in the front thunderbike turn signals have been used to create a clean look across the bars.
